Reflection of Seminar

The seminar held at our university, where the owner of DPL IT was invited as a guest speaker, was a very informative and inspiring experience for me. He shared his personal journey in detail and explained how he started his career, faced difficulties, and gradually achieved his goals through hardwork and determination. Listening to his real life experiences helped me understand that success requires patience, consistency and continuous learning.

During Seminar he talked about various new & emerging technologies and how the IT field is rapidly evolving. Another interesting part of the seminar was his discussion about Stock market, where he explained how technology is influencing investments and financial growth, which clarified many of my doubts. Overall Seminar motivated me to think more clearly about my future career it gave me new ideas, increased my confidence and encourage me to focus on my goals while continuously learning and improving myself.
